SuGree Tables

Contemporary, Futuristic Looking Tables Created from End-of-life Solar Modules and Materials

- Durable
- Affordable
- Innovative Design
- Made in India

SuGree Tables are an innovative range of Tables created from End-of-Life Solar PV Modules and other materials which make up the frames. They are made from up used, recycled or waste materials and hence are Green initiative, Environment Saving Products. Idea is to reuse the products which would have otherwise gone for landfill or recycling, hence supporting Circular Economy, and extending the useful life of the Solar Modules beyond Generating Power on Roof or Field. Frames come in Options of being made from Recycled Plastics, Old Packing Materials, Plywood, Wood from old Ships dismantled at their end of service.

SuGree Table Features:

- SuGree Tables are made from Solar PV Modules, with Toughened Glass Top and Anodized Aluminum Frame. The Aluminum Frames can be painted if needed.
- Modular Frames, easy to assemble frames are made from following materials to choose
 - Recycled Plastic Top, Top Frame and Legs.
 - Reusing the good quality Wood from Old Ships that are dismantled after the end of service.
 - Reusing the good quality Wood and Plywood from Packing Boxes.
- Option (Based on availability of Stock) of Tables with Solar Modules that can still generate power from indoor daylight to light up the table lamp at night. These Tables would have a Solar Controller, Battery, and DC Table Light Lamp.
- The Re-use Wooden Frames are also made by collaborating with NGOs that support the physically challenged, handicapped people, providing employment to them. Hence this also becomes an activity for social cause.
